INDUSTRIAL ACCIDENTS TASMANIA 1984-85

G.D.COCKING

Deputy Commonwealth Statistician
and
Government Statistician of Tasmania

188 COLLINS STREET, HOBART
JUNE 1986
(F)

INQUIRIES

Inquiries concerning these statistics may be made by telephoning Hobart (002) 209 453 (Mr M. Raine). For other general inquiries including copies of publications, telephone the Information Officer on Hobart (002) 209 409.
The Tasmanian Office of the Bureau is located on the 3rd Floor of the Commonwealth Government Centre, 188 Collins Street, Hobart (GPO Box 66A, Hobart, 7001).

MAIN FEATURES

- In 1984-85, 9 795 original claim industrial accidents were reported to the ABS. Compensation to be paid in respect of these accidents is estimated at \$16.8m and time lost at 28 300 weeks.
- The average leave in respect of these claims was 19 days for males, 25 for females (20 days for persons overall). Average compensation paid was \$1 700 for non-fatal accidents.
- Forty seven per cent of reported accidents involved time losses of less than one week.
- In 1984-85, 10 fatal accidents were reported; all of these involved males.

EXPLANATORY NOTES

Introduction

The statistics in this bulletin have been compiled from reports of workers' compensation claims for accidents occurring during 1984-85. Prior to 1977-78 statistics were compiled on a 'cases finalised' basis. Figures prior to 1977-78 are therefore not strictly comparable with later years. The reports are submitted by insurance companies, self-insurers and State Government departments.

2. Close liaison has been established by the ABS with insurers for the purpose of achieving and maintaining coverage and accuracy in the collection and co-operation has generally been good. In the past, however, there was no effective way of checking to ensure that reports were received for all claims coming within the scope of the collection. Caution should therefore be used in drawing any conclusions regarding the trend in the statistics over time. The principal value of the statistics lies in the detailed analysis which has been carried out to show accidents classified by industry group, occupation group, agency of accident, type of accident, nature of injury, site of injury, month of occurrence, age group and duration of time lost.

3. For 1984-85 the statistics represent industrial accidents reported by insurers as occurring during the financial year. Reports are received until 31 October at which time insurers estimate time lost and compensation to be paid for any outstanding accidents which occurred in the financial year.

4. Prior to 1977-78 reports were tabulated on the basis of claims finalised in a particular financial year by insurers. This differed from the 1977-78 and later years' collections in the following ways:

- (a) accidents may have occurred in the year in which the claim was finalised or during some earlier year;
- (b) the methods used by insurers for determining when claims are finalised vary greatly;
- (c) in many instances there existed a considerable time-lag between the finalisation of claims and the completion of reports.

5. The statistics relate to persons covered under the Tasmanian Workers' Compensation Act 1927, plus State police officers. Notable exclusions are self-employed persons and all Australian Government employees. Exclusion of self-employed persons is likely to have a marked effect on figures for industries where self-employment is prevalent (e.g. retail trade, rural industries). Because of the exclusion of Australian Government employees, some industry classifications are not covered at all (e.g. defence services and communications), while coverage is reduced in other industries.

6. While every effort has been made to make this bulletin as comprehensive as possible resources do not permit the publication of all the information that is available. In particular, details are readily available by sex for those tables for which persons only are shown in this bulletin. A more detailed industry split is also available. In addition, ad-hoc tables can be produced on request using as parameters any of the data items supplied on the industrial accident reports.

7. The tables in this bulletin cover industrial accidents involving original claims only. During 1984-85 145 industrial accident returns involving re-opened claims were received by the ABS. These claims involved an estimated additional cost of \$404 417.

Definitions

8. For the purpose of this collection the following definitions have been adopted:

Agency of accident: Is the object, substance or circumstance most closely associated with the injury and which in general could have been guarded against or corrected. A distinction should be made between the agency of injury and agency of accident, e.g. a fire damp explosion and a miner crushed by a falling beam. Agency of injury is the beam but the agency of accident is the material responsible for the fire damp explosion. Agency of accident is classified according to Agency of Accident Classification.

Cost of claims: Includes compensation for wages lost and for hospital and medical expenses; and also lump sum settlements of cases reported as occurring during the year. Where final details are not available insurers are asked to provide estimates. This is most likely to occur in those cases involving fatalities or serious injuries. Care must be taken before drawing conclusions based on variations in cost of claims patterns.

Duration of leave: The period of time between the date ceased work due to the accident and the date resumed or declared fit to resume work. (In the case where several periods of absence occur it is the sum of those periods.) It is not paid days off. It may include weekends, etc. An injured party may not necessarily be prevented from working in a second job during this period. It does not necessarily reflect the time an employee is away from the specific job in which the accident occurred; for example he may have returned to work on light duties.

Industrial accident: A compensatable claim under the Workers' Compensation Act 1927 that arises out of a work related event and leads to a loss of time of one day (shift) or more (not including the day of the accident), permanent total incapacity, or death, and involves a claim for payment, under the Workers' Compensation Act 1927. Note if the claim is a re-opened claim then additional time-off may or may not be involved. Normally it will be. Industrial accidents include industrial disease cases.

Industry: Classified in accordance with the Australian Standard Industrial Classification (ASIC) 1983 Edition. From 1971-72 to 1978-79 the Preliminary Edition 1969 of ASIC was used and from 1979-80 to 1983-84 the 1978 Edition was used. Earlier years used the 1966 Population Census Classification of Industries.

Occupation: Classified in accordance with the 1981 Population Census Classification of Occupation.

Original claim: Cases which involve the first claim against the insurer for compensation for an industrial accident or industrial disease case.

Re-opened claim: Cases previously closed in which the insurer accepts that further incapacity or additional medical treatment, etc. are directly attributable to the original accident.

Type of accident: Is defined by the International Labour Office as: (i) the manner of contact of the injured person with the object or substance; or (ii) the exposure or movement of the injured person which resulted in the injury. In some cases the choice between (i) and (ii) may give rise to conflict e.g. worker falls from ladder and grabs a hot pipe to prevent the fall. According to (i) the type of accident would be contact with hot substance or object; to (ii) type of accident would be fall from height. In such situations the type of accident is selected according to which event caused the more severe injury.

9. More details of industry and occupation classifications may be made available on application to the ABS.

RELATED PUBLICATIONS

Industrial Accidents Queensland (6301.3), annual.

Industrial Accidents, South Australia (6301.4), annual.

Industrial Accidents, Western Australia (6301.5), annual.

10. All publications produced by the ABS are listed in the annual Catalogue of Publications (1101.0) which is available free of charge from any ABS Office.

SYMBOLS AND OTHER USAGES

11. The following standard symbols are used in publications of the Tasmanian Office of the ABS:

ASIC	Australian Standard Industrial Classification
n.e.c.	not elsewhere classified
n.p.	not available for separate publication but included in totals where applicable
-	nil or less than half the unit shown

Values are shown in Australian currency.

12. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
